Art Unit: 2155

DETAILED ACTION

1. In view of the appeal brief filed on 25 July 2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 102

Page 3

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 3. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Courtright, II et al. (U.S. 6,157,963).
- 4. With respect to claim 1, Courtright teaches a method for managing transactions at a network storage device comprising:

Receiving an incoming transaction at the network storage device (Courtright, col. 4, lines 52-58); and assigning a priority to the incoming transaction relative to other incoming transactions at the network storage device based at least in part on a usage policy (Courtright, col. 4, lines 58-67).

5. With respect to claim 2, Courtright teaches the invention described in claim 1, including a method further comprising receiving the usage policy at a network storage device (Courtright, col. 8, lines 31-42), and where the network storage device is a NAS device (Courtright, col. 1, lines 13-19).

Art Unit: 2155

6. With respect to claim 3, Courtright teaches the invention described in claim 1, including a method further comprising:

Reading meta data from the transaction; and comparing the meta data to a number of rules defined in the usage policy, where assigning the priority to the transaction is based on at least part of the meta data satisfying at least one condition of the number of rules (Courtright, col. 4, lines 52-58).

- 7. With respect to claim 4, Courtright teaches the invention described in claim 1, including ordering the transaction among other transactions in a queue at the network storage device (Courtright, col. 8, line 63 col. 9, line 3).
- 8. With respect to claim 5, Courtright teaches a method for managing transactions at a network storage device, comprising:

Generating a usage policy for the network storage device; and distributing the usage policy to the network storage device for prioritizing a plurality of incoming transactions received at the network storage device relative to one another (Courtright, col. 8, lines 31-42).

9. With respect to claim 6, Courtright teaches the invention described in claim 5, including a method further comprising identifying the network storage device on a network (Courtright, col. 1, lines 13-19), and where the network storage device is a NAS device (Courtright, col. 1, lines 13-19).

Art Unit: 2155

- 10. With respect to claim 7, Courtright teaches the invention described in claim 5, including a method where the usage policy comprises a number of rules, each including meta data and a corresponding priority (Courtright, col. 4, lines 52-67).
- 11. With respect to claim 12, Courtright teaches the invention described in claim 8, including an apparatus where the usage policy comprises a number of default rules (Courtright, col. 6, line 1 col. 7, line 3).
- 12. With respect to claim 13, Courtright teaches an apparatus for managing a plurality of incoming and outgoing transactions at a network storage device, comprising:

Computer readable storage medium (Courtright, col. 3, lines 55-61); and computer readable program code residing in the storage medium, including program code for defining a usage policy for prioritizing the plurality of incoming and outgoing transactions relative to one another (Courtright, col. 5, lines 7-20).

- 13. With respect to claim 14, Courtright teaches the invention described in claim 13, where the computer readable program code resides at a policy management server and further comprises program code for distributing the usage policy to the network storage device (Courtright, col. 8, lines 31-42).
- 14. Claims 8-11, 15, 16 and 18-21 do not teach or define any new limitations above claims 1-3 and 13 and therefore are rejected for similar reasons.

Application/Control Number: 09/858,080

Art Unit: 2155

Response to Arguments

- 15. Applicant's arguments filed 25 July 2006 have been fully considered, but they are not persuasive for the reasons set forth below.
- 16. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Page 7

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Alicia Baturay whose telephone number is (571) 272-3981. The examiner

can normally be reached at M-Th 7:15 - 5pm, 2nd Fridays 7:15-3:45, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh

Najjar can be reached on (571) 272-4006. The fax phone number for the organization where this

application or proceeding is assigned is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be

obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
